

1. Render module in component

```
<?php  
  
jimport('joomla.application.module.helper' );  
  
$module = &JModuleHelper::getModule('mod_breadcrumbs');  
  
$html = JModuleHelper::renderModule($module);  
  
echo $html;  
  
?>
```

2. Clear text from tags:

```
strip_tags("Hello <b>world!</b>");
```

3. Meta tags in header:

```
$doc = JFactory::getDocument();  
  
$doc->addCustomTag("<meta property='og:type' content='article'/>")
```

4. Text

```
echo JHtmlString::truncate($text,250);  
  
strip_tags($product->product_short_desc);
```
